

GLUCOSE MONITORING SYSTEMS

January 2019

Glucose Monitoring Systems

Effective January 1, 2019 RWAM will provide coverage for Glucose Monitoring Systems (GMS) under Extended Health Care benefit plans that include coverage for Medical Service and Supplies.

RWAM is pleased to support patient care as technology evolves. Glucose Monitoring Systems include a reader device and sensors which are used to measure glucose levels and provide results immediately.

For applicable EHC plans with 'Medical Services and Supplies' coverage, Glucose Monitoring Systems will be eligible based on the following parameters:

- Individuals must be insulin dependent
- All claims must be submitted for reimbursement under the EHC benefit
- Limited to a combined annual maximum of \$3,000.00 for GMS devices and sensors

Please contact your Advisor if you have any questions.
